EDUCATION

Delft University of Technology (TU Delft) Sep 2024 - Jul 2027 (expected)

BSc Computer Science & Engineering, data track | **GPA: 8.62 / 10**

- Courses: Machine Learning, Computer Graphics, Software Project, Computational Intelligence, Data Mining

École Polytechnique Fédérale de Lausanne (EPFL) Sep 2026 - Jan 2027

Exchange semester, Computer Science

- Current coursework: Decentralized Systems Engineering, Advanced Networks, Mobile Networks, Numerical Methods for Visual Computing and ML, Automatic Speech Processing

EXPERIENCE

Scaled Autonomy — Perception Engineer Jun 2026 – Aug 2026

Delft, Netherlands · drone autonomy start-up · part-time

- Developed real-time visual detection and tracking pipelines for autonomous drones, running on embedded edge hardware.
- Hired directly after the university software project below, continuing work on the system.

Freelance Web Developer 2025 - present

- Developed an online prescription request portal for an ophthalmology practice (ocnikrnov.cz), used by patients.
- Built and continue to maintain websites for local businesses (ocnikrnov.cz, sportopava.cz, slezskysquash.cz).

PROJECTS

Scaled Autonomy — TU Delft Software Project Apr 2026 – Jun 2026

Team project with Scaled Autonomy as the client

- Worked in a student team to build a collaborative drone detection system in an industry setting.

Rally - racket-sports ladder platform Python, FastAPI, SQLite, React, Next.js

- Full-stack app for squash, badminton and table-tennis ladders at a single venue, with a FastAPI REST backend and a React/Next.js frontend.
- Designed a custom Elo-based rating that weights results by match length and margin, and a match state machine (pending, confirmed, disputed, auto-confirmed after 24 h).

Adversarial attacks on image classifiers Python, PyTorch

- Trained a ResNet classifier and evaluated its robustness against FGSM attacks at several perturbation strengths.

SKILLS

Programming: Python, Java, JavaScript, SQL, C++, Scala
Frameworks & libraries: FastAPI, Spring Boot, React, Next.js, PyTorch
Languages: Czech (native), English (fluent), German (basic)
